

Module 2: Creativity

Topic 2.3: Techniques for teaching creativity

Quiz

Check your knowledge by answering questions in the following quiz:

Creativity is a way of ...

- writing
- sensing
- thinking
- doing art

Please, choose the answer, that you think is right:

- Teaching and learning should emphasize the connection between human creativity and educational purposes.
- Teaching and learning should emphasize the connection between the process of teaching and technological change.
- Teaching and learning should emphasize the connection between human creativity and technological change.
- Teaching and learning should emphasize the connection between human creativity and the way of teaching.

Successful teachers:

- Avoid the real-world examples.
- Do not like risk-taking.
- Try to apply cross-curricular connections.
- Appreciate the right answers.

Creative teachers:

- use cross-disciplinary approaches
- give real-world assignments
- come in the classroom five minutes earlier to talk to students
- wear shiny clothes
- show a willingness to try new things
- draw while they speak

How to motivate students to be creative – choose the most inappropriate answer:

- You should be respectful to their way of thinking.
- You should tell them that it is not ok not to have the right answer.
- You should let them know that drawing is not the only way to be creative.
- You should let them know that they need to be able to think in a way that could possibly generate the right kind of answer.
